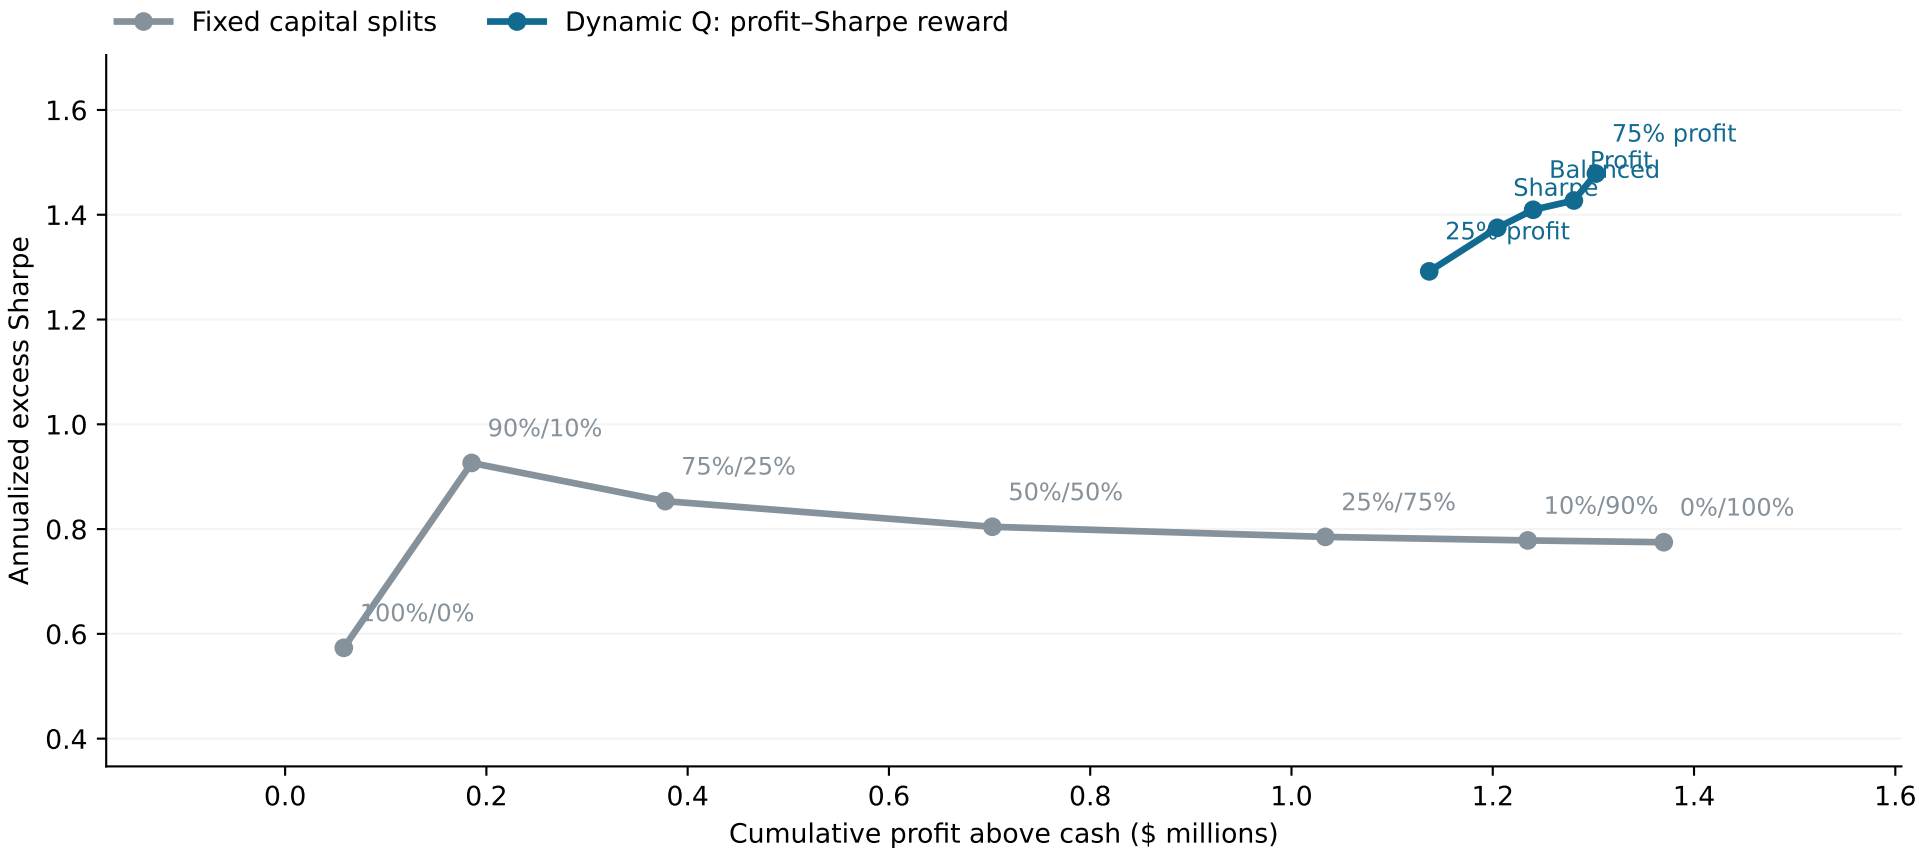
Rewarding profit versus rewarding Sharpe

2018–2021 validation · Dynamic allocation across the same best two bandits · Discount 0.99



Q endpoints target Sharpe and net dollar profit; intermediate points blend those rewards. All five objectives shown.

Sharpe reward formulation selected on validation and frozen for the whole curve. Same fixed mixes, budget and costs.

Sharpe-change reward is a historical replacement surrogate, not a guarantee of globally optimal Sharpe. Previously researched dates.
